OBJECTIVE

Python developer with 2+ years of experience building AI-powered intelligent applications, chatbots, and web solutions. I specialize in turning complex AI concepts into practical business tools. My work spans from creating custom LLM-based chatbots to building full-stack e-commerce platforms. I combine strong technical skills in machine learning and web development with a genuine curiosity for emerging technologies. I'm looking for a role where I can contribute to meaningful projects while growing alongside a team that values innovation and continuous learning.

PROFESSIONAL EXPERIENCE

BrainSpark Digital, Python Developer 2023 – present

- Built 5+ custom AI chatbots using Large Language Models (LLMs) and deep learning for various business use cases, helping clients automate customer support and lead generation
- Designed and deployed Agentic AI workflows that automate complex business processes, reducing manual work by 40% for clients
- Created the company's full website using Django, which directly contributed to a 60% increase in client inquiries
- Implemented RAG (Retrieval-Augmented Generation) systems to improve chatbot accuracy and contextual understanding
- Worked with FastAPI and Flask to build scalable backend APIs for AI applications

Technologies used: Python, Django, FastAPI, Flask, OpenAI API, Google AI studio API, Agno, LangChain, PostgreSQL, Docker, Git

Abacus Computer, Internship 2018 – 2019

- Contributed to the development of an e-commerce website project.
- Assisted with system administration and networking tasks within the office, gaining practical experience in maintaining internal systems.

PROJECTS

AI-Powered Malware Detection System | Research Project

- Researched and developed a malware detection system using AI that converts binary files into images and classifies them using deep learning
- Achieved high accuracy in identifying malicious software patterns through computer vision techniques
- **Tech Stack:** Python, TensorFlow, Computer Vision, Image Classification

Full E-Commerce Platform | Personal Project

- Built a complete e-commerce website from scratch with Django, including user authentication, product catalog, shopping cart, and payment integration
- Implemented admin dashboard for inventory management and order tracking
- **Tech Stack:** Django, PostgreSQL, HTML/CSS, JavaScript

Gemini Nano Image Recognition App | Hackathon Project

- Developed "Banana" image recognition app using Google's Gemini Nano during a hackathon
- Created an AI-powered tool that identifies and classifies images in real-time
- **Tech Stack:** Google Gemini API, Python, Computer Vision

EDUCATION

Computer Science & Engineering (B.Sc.),
Uttara University

- Cumulative GPA: 3.96 out of 4.0

2019 – 2023 | Dhaka, Bangladesh

Diploma Engineering in Computer Technology,
Model Institute of Science & Technology (MIST)

- Cumulative GPA: 3.27 out of 4.0

2014 – 2018 | Gazipur, Bangladesh

Secondary School Certificate (S.S.C),
Rani Bilashmoni Govt. Boys High School

- GPA: 5.0 out of 5.0

2010 – 2013 | Gazipur, Bangladesh

SKILLS

Programming

Languages

Python, C, C++, Java

Machine Learning & AI

- Traditional Machine Learning and Deep Learning
- Computer Vision (YOLO, Image Classification)
- Large Language Models (LLMs) and Prompt Engineering
- RAG (Retrieval-Augmented Generation)
- Agentic AI and AI Workflows

Web Development

- Backend: Django, Flask, FastAPI
- Frontend: HTML, CSS
- Databases: PostgreSQL, SQLite, SQL
- SEO: Technical SEO, Entity SEO

Software Tools & Platforms

Git, Docker, GitHub, Linux CLI Tools

Other Skills

Business Process Automation, Python Scripting, API Development, Research & Documentation

LANGUAGES

Bangla

English

INTERESTS

- Reading
- Travel
- Gardening
- Learning New Technologies

DECLARATION

I hereby declare that all the information provided in this resume is accurate and true to the best of my knowledge and belief. I am responsible for the authenticity of the details mentioned.
